

SAUNAS

Infrared Sauna Safety: Low EMF/Low ELF

As a trusted health and wellness company, your health is our top priority. That is why our True Wave™ infrared heaters are the safest and most effective on the market today. To prove it, Jacuzzi® infrared saunas are designed to be the only ones that cancel both EMF and ELF and have the best testing record in the industry.

What is EMF?

Electromagnetic Fields; EMF and ELF have been called “dirty electricity” and are the unintentional wavelengths produced by things like, computers, appliances, cell phones and electrical wiring. EMF/ELF has increased steadily over the past 50-100 years as our daily use of electronic and labor saving devices has skyrocketed. This has become a real public health concern.

Some of the health risks linked to Electromagnetic Fields:

- Incidence of cancer
- Memory Loss
- Depression
- Loss of Energy
- Irritability
- Inability to Concentrate
- Weakened Immune System
- Chronic Fatigue
- Headaches

Thresholds of Concern

The EPA, NIH, World Health Organization (WHO) and private research organizations have been studying EMF/ELF and its' effects on humans for many years. WHO recommends to not expose yourself to any EMF greater than 3 milligauss (mG) for more than a few seconds. Our saunas guarantee that where you sit in the sauna, the reading will be near Zero mG.

WHO also recommends exposure of ELF to be no greater than 10 millivolts. Jacuzzi® Infrared Saunas average 3.4 mV, which is well below the threshold of concern. Many of our competitors' saunas tested 300+ mV, an alarming difference.

Jacuzzi® Infrared Saunas have Virtually No EMF/ELF

This is what we found testing many of our competitors' heaters

Other Regular Carbon Heaters
30mG–60mG

Other Ceramic Infrared Heaters
20mG–40mG

Jacuzzi® Infrared Saunas
<3mG

*acceptable levels should be below 3mG

Patented Technology Keeps Our Saunas Safe

We manufacture our saunas with advanced heater systems to keep you and your family safe. We go to extra lengths such as shielding our heater wiring in metal conduit and twisting the wires inside the conduit to reduce the EMF levels even further. Lastly, we shield all electrical components to help block the EMF/ELF and ground the heater to further eliminate any stray electrical wavelengths at their source.

Your Jacuzzi® infrared sauna will have EMF and ELF levels below the threshold of concern where you are sitting in your sauna. We have designed our saunas to be as safe as possible.
